

IPE DECKING

Also known as Brazilian Walnut

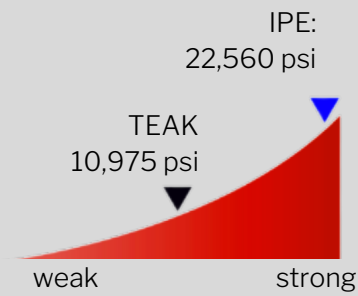

Ipe Hardness

Ipe Lifespan

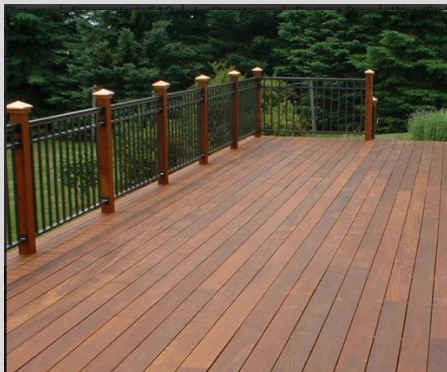

Ipe Bending Strength

The World's Best Decking

Ipe is the finest quality hardwood available with Ipe decking proven to keep its integrity and last longer than any other decking material. Ipe is naturally resistant to rot and is over 3 times harder than traditional Teak. These natural qualities mean an Ipe deck can last 75+ years without constant staining or refinishing. Ipe decking is responsibly harvested from managed forests to provide a truly renewable resource. **Ipe is available in both FSC and non-FSC.**

CUMARU

Also known as Brazilian Teak

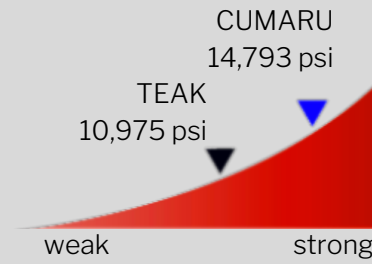

Cumaru Hardness

Cumaru Lifespan

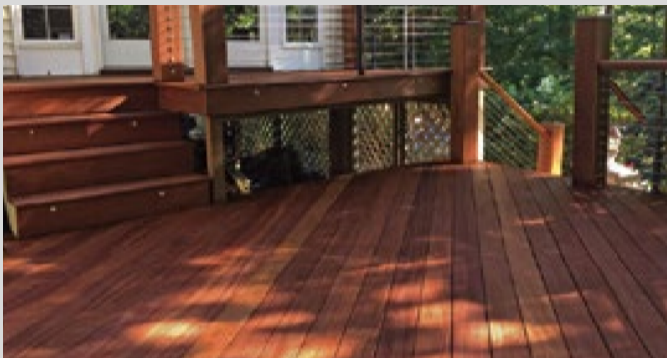

Cumaru Bending Strength

Resilient decking for ALL environments

Cumaru is an incredible, low-maintenance hardwood that offers a beautiful array of amber-red to golden-honey colours. Each board of premium-grade Cumaru is also naturally resistant to rot, decay and insects. This exotic specie rivals Ipe in strength and is 3 times harder than Teak. With a lifespan of well over 50 years, you will enjoy your Cumaru deck for decades. With such strength and beauty, a Cumaru deck is an investment that could potentially increase your homes value. **Cumaru is available in both FSC and non-FSC.**

MASSARANDUBA

Also known as Brazilian Redwood

Massaranduba Hardness

Massaranduba:

3,190 lbs

Massaranduba Lifespan

Massaranduba:

50+ YEARS

MOST SYNTHETICS: up to 10 Years

Massaranduba Bending Strength

Massaranduba:

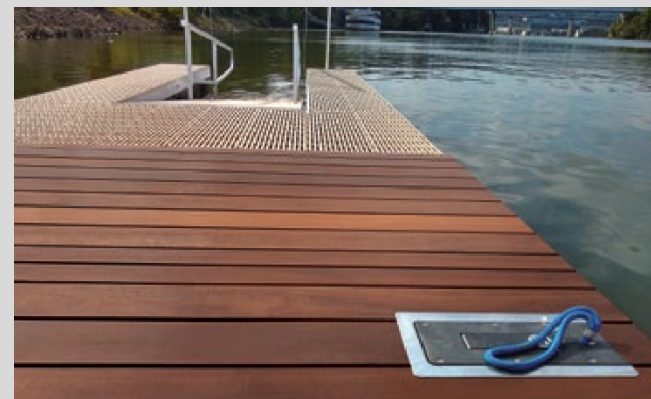

14,793 psi

TEAK 10,975 psi

Brazilian Redwood outperforms and outlasts traditional Redwood

Massaranduba bears the distinction of being one of the hardest and most beautiful woods in the world, as well as the most abundant hardwood specie in South America. With such a dependable material, you can enjoy outdoor living year-round without worrying about constant staining or heavy-duty maintenance. One surprising fact about this natural hardwood is how well it performs under heavy load (bending strength) tests. These tests revealed that, as decking material, Massaranduba is nearly three times stronger than Teak.
